

Federal Fleet Files

Vol. 2, No. 12 – November 2010

Highlighting the latest news and developments affecting Federal fleets.

Clean Cities Coordinators—A Natural Resource for Federal Fleet Managers

Recently, the U.S. Department of Energy's (DOE) Clean Cities program held its annual training for the 87 Clean Cities coalitions throughout the country. During this training, Clean Cities coordinators were asked to discuss strategies on how they can better help Federal fleets in their coalitions. Based on their feedback, many coordinators noted an inability to locate and engage local Federal fleet managers, especially those with a significant number of Energy Policy Act (EPAct) Section 701 waivers.

DOE's Federal Energy Management Program (FEMP) recommends that Federal fleet managers get to know the local Clean Cities coordinators in their regions. Clean Cities coordinators have proven to be an invaluable resource for Federal fleet managers, helping them find solutions to alternative fuel availability and bringing valuable stakeholders to the table to help fleet managers overcome the barriers to meeting their alternative fuel use and petroleum reduction mandates. Federal fleet managers and coordinators can work together to address the goals and strategies listed in the *Comprehensive Federal Fleet Management Handbook* (www.femp.energy.gov/pdfs/eo13514_fleethandbook.pdf) and *Guidance for Federal Agencies on E.O. 13514 Section 12, Federal Fleet Management* (www.femp.energy.gov/pdfs/fleetguidance_13514.pdf).

Fleet managers can locate and contact their local Clean Cities coordinators by visiting www.cleancities.energy.gov and clicking on the "Coordinator Contacts" and/or "Coalition Locations" links. In order to create a better mechanism for collaboration, FEMP wants to hear from Federal fleet managers about their experiences working with the Clean Cities program. Send comments and stories to Ryan Daley at the National Renewable Energy Laboratory (NREL) at ryan.daley@nrel.gov.

Success Story: Aloha Delivers First Supply of E85 in Hawaii

At the end of October 2010, Aloha Petroleum Ltd. delivered the state's first supply of E85 ethanol fuel. The fuel was delivered to Marine Corps Base (MCB) Hawaii for use in more than 70 of its flex-fuel vehicles. While E85 has been available on the mainland since the early 1990s, this is the first time the fuel has been made available on a commercial scale in Hawaii. Aloha Petroleum has supplied fuels to the military through the Defense Energy Support Center contract for a decade. With the E85 contract, Aloha Petroleum will help MCB Hawaii achieve its alternative fuel use goals.

"Last week's delivery is a significant milestone for the state of Hawaii and Aloha Petroleum," said Richard Parry, Aloha Petroleum president and CEO. "We've been working with the U.S. Department of Defense for the last three years on various alternative fuel projects. We believe that the new E85 station at Marine Corps Base Hawaii will help pave the way for wider use of E85 in the Islands."

Federal Fleet Files Contact

The FEMP Federal fleet team continually strives to increase outreach to Federal fleet managers. This publication provides updates on regulatory issues and reporting deadlines, highlights success stories and best practices, promotes upcoming events, and informs fleets on the expanding availability of alternative fueling stations. For comments or to subscribe to Federal Fleet Files, contact Ryan Daley at ryan.daley@nrel.gov.

Greenhouse Gas Concentrations

The White House Council on Environmental Quality (CEQ) has released Guidance on Federal Greenhouse Gas (GHG) Accounting and Reporting that establishes government-wide requirements for measuring and reporting GHG emissions associated with Federal agency operations. The Guidance serves as the Federal Government's official GHG Protocol and will be used by Federal agencies to develop their first GHG inventories. Federal agencies will submit GHG inventories annually beginning in January of 2011. More information is available at www.whitehouse.gov/administration/eop/ceq/sustainability/fed-ghg.

Alternative Fuel Finder

NREL maintains a database of alternative fueling stations nationwide through the DOE Alternative Fuels and Advanced Vehicles Data Center (AFDC). The list below shows new alternative fueling stations added to the database since last publication. Unless otherwise noted, only open, publicly accessible stations are included. Stations accept Wright Express and Voyager fleet payment cards unless otherwise noted. Electric charging stations are included to prepare agencies for incorporating electric vehicles into fleets; fleet payment card acceptance is unknown for these stations. Check the AFDC Alternative Fueling Station Locator for up-to-date information: www.afdc.energy.gov/afdc/locator/stations/.

Type	Station Name	Street Address	City	ST	Waivers*	Agencies Affected†
BD	Jiffy Mart - Shell	2284 Baltimore Blvd	Finksburg	MD	n/a	n/a
