Report Organization

This report, *Data Summary of Municipal Solid Waste Management Alternatives*, comprises 12 separately bound volumes. Volume I contains the report text. Volume II contains supporting exhibits. Volumes III through X are appendices, each addressing a specific MSW management technology. Volumes XI and XII contain project bibliographies. The document control page at the back of this volume contains contacts for obtaining copies of the other volumes.

Volume	Contents	Document Number
I	Report Text	TP-431-4988A
II	Exhibits	TP-431-4988B
III	Appendix A Mass Burn Technologies	TP-431-4988C
IV	Appendix B RDF Technologies	TP-431-4988D
V	Appendix C Fluidized-Bed Combustion	TP-431-4988E
VI	Appendix D Pyrolysis and Gasification of MSW	TP-431-4988F
VII	Appendix E Material Recovery/Material Recycling Technologies	TP-431-4988G
VIII	Appendix F Landfills	TP-431-4988H
IX	Appendix G Composting	TP-431-4988I
X	Appendix H Anaerobic Digestion of MSW	TP-431-4988J
XI	Alphabetically Indexed Bibliography	TP-431-4988K
XII	Numerically Indexed Bibliography	TP-431-4988L

16. Abstract (Limit: 200 words) The overall objective of the study in this report was to gather data on waste management technologies to allow comparison of various alternatives for managing municipal solid waste (MSW). The specific objectives of the study were to: 1. Compile detailed data for existing waste management technologies on costs, environmental releases, energy requirements and production, and coproducts such as recycled materials and compost. 2. Identify missing information necessary to make energy, economic, and environmental comparisons of various MSW management technologies, and define needed research that could enhance the usefulness of the technology. 3. Develop a data base that can be used to identify the technology that best meets specific criteria defined by a user of the data base. Volume I contains the report text. Volume II contains supporting exhibits. Volumes III through X are appendices, each addressing a specific MSW management technology. Volumes XI and XII contain project bibliographies.
